

Some figures on imported MDs in recent years

Investments in MDs are recently very popular and playing an important role in examination and treatment at all levels:

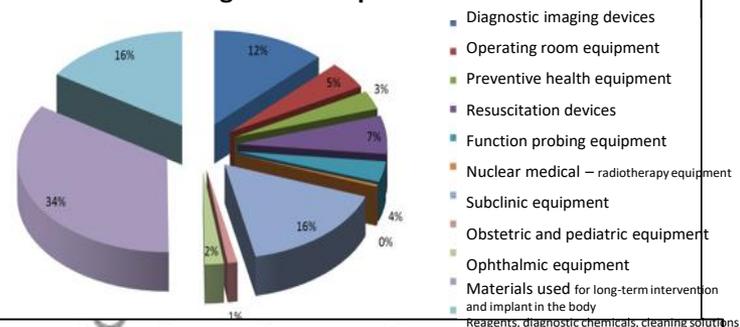

- A lot of central and regional hospitals are invested, equipped and updated with technical advances similar to other countries in the region.
- Depending on scale, class, and technical functions, hospitals at each level are gradually upgraded, invested with synchronous MDs, mainly focusing on the following faculties:

- Diagnostic imaging, functional exploration
- Biochemical, immunological, molecular biological testing
- Operating room, resuscitation, active treatment
- Infection control
- Clinic, emergency, etc.
- ...
